SCULO THORLACIUS Isl.

SPONSI Frater.

HAFNIÆ,

pis PETRI HAKII, Academ. Typogr. 1658.

Æpe duos solers numeravit navita soles,  
Contigit & lunas sepe videre duas,  
Ambo asserta probo, geminataq; lumina  
pono  
Sint paradoxa licet, non ratione  
carent.

Sol est obscuro qvi præbet lumina mundo,  
Et media rutilæ regnat in arce plagæ,  
Qvi tenebras pellit rudioris luce popelli,  
Et qvi lucifluas fundit in orbe Comas,  
Et gelidæ mediam boreæ qvi dirigit oram,  
Doctrinæ radiis, illene Phæbus erit?  
Sol idem est cujus prælustri lumine Conjunx  
Nocte quidem tota Cynthia tota micat:  
Tempore nocturno Cujus pariterqve diurno  
Luce nitet Conjux, Ilene Phæbus  
Tu GISLAE tuis ut toti Cynthius O  
Luces, te solem nil vocitare vetat:  
Tu decus astrorum; tu lumine nubila pe  
Corrigis incitiam Cognitione rud  
Omni genæ totus virtutis luce Coruscas  
Hinc cujus patulas spargis & inde  
Illis qvos fundis radiis, tua GROA ref  
Atqve tuis flammis obvia tota mic  
Illa suos coëunte ignes, Conjungit & un  
Cornu, cedit ei Delia lucis inops,  
Et solem & lunam caligine vidimus atra  
Sæpe tegi, & radios oculuisse suos.  
Vestra sed æterni splendoris gloria nunqua  
Deficiet sed fax vestra perennis erit,  
Emphaticis quid, de meteoris Physica dicit  
GISLAUS Phœbus, GROA Diana
